

Tabarestan Clay Industries

Why Clay Tile?

Durability

Clay tile is known for its long-term durability and longevity. Tabarestan's modern manufacturing techniques enhance this durability, giving customers a roofing product that is sure to last.

Sustainability

Our clay tiles are truly sustainable and do not cause harm to the environment for the life of the product. Our clay roofing products are made with up to 100% recycled raw materials and are 100% recyclable.

Value

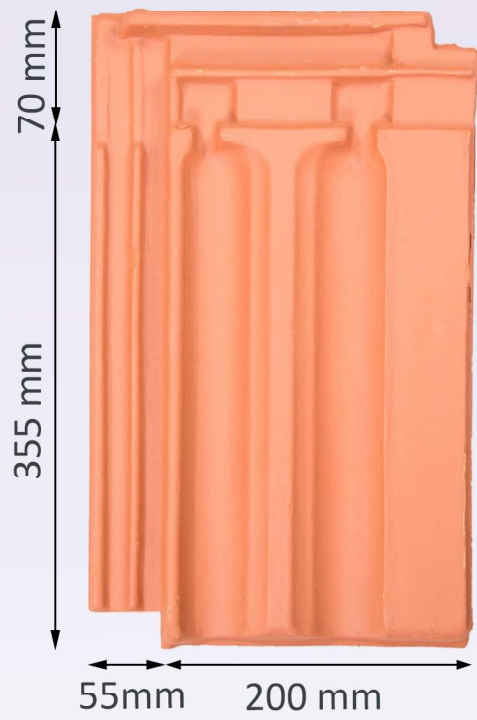

Clay tile has proven its durability, longevity and aesthetic appeal over thousands of years. It also has reflective properties, which help to increase the efficiency of heating and cooling systems. This type of material is not susceptible to mold or rot, can withstand hurricane-force winds, and does not shrink and expand with the temperature like wood.
